

Declassified for NASA Equities
- Per NASA letter.

20 July 1959

MEMORANDUM FOR : Director of Central Intelligence

SUBJECT : CIA Position in USIB Relative to Project TIROS

REFERENCE : USIB-D-33.7/1, dated 13 July 1959
Subject: Intelligence Aspects of Project TIROS

1. Project TIROS is an approved television camera system which will furnish very poor pictures of the earth, plus weather data, from a small satellite vehicle. Results achieved will be of a very low security classification, controlled by NASA.
2. There are political and security implications to CORONA involved. These have been reviewed and are set forth in the attached background paper (COR-0557).
3. RECOMMENDATIONS: It is recommended that the following CIA position be taken in the USIB on this item:
 - a. That this item be considered separately by CORONA-cleared members of the Board.
 - b. That CIA make no objection to TIROS provided the priority and security of CORONA are protected.
